

The hardest night of the theme. Change of direction goes in on top of the running.

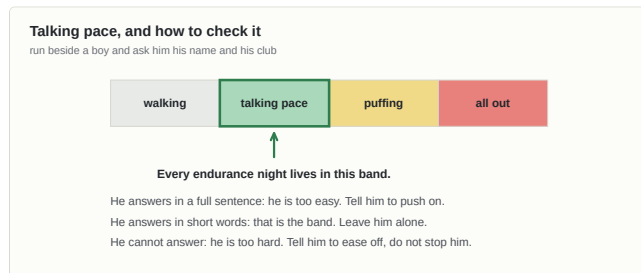

ON THE GROUND

- 24 cones, six lanes with turns at 5, 10 and 15 metres

1 minute setup. Set it up before the first group arrives and leave it for all three.

Six lanes with turn cones at 5, 10 and 15 metres

Talking pace, and the question that checks it

6 to 11 Challenge game: team relay

- Five teams of five. Each boy runs one lap of the loop and tags the next.
- Every boy runs three times. Call the group lap total from session 5 and see if they beat it.
- The teams are mixed up every round, so nobody is stuck on a losing team.
- Walk a lap together at the end while you tell them the total.

Coach one thing: The same speed out and back.

- Boys slowing to a walk before the turn cone rather than running through it.
- The pace going up tonight. It never goes up on a Thursday.

Lashing rain. Move the turn cones in a metre. Wet grass and a hard turn is how ankles go.

1 to 6 Movement: shuttles

- Six lanes with a cone at 5, 10 and 15 metres. Four boys to a lane.
- Call a distance. The front boy runs out to that cone, touches it, and runs back at the same speed.
- Keep it continuous for sixty seconds, then thirty seconds rest. Six goes.
- Same pace out and back. A boy who sprints out and walks back has missed the point.
