

The hardest night of the theme. One foot landings, which is what actually happens in a match.

ON THE GROUND

- 12 cones, six lanes
- 6 mini hurdles, 15 cm
- 25 discs, hands free

Set it up before the first group arrives and leave it for all three.

A mini hurdle in the middle of each of the six lanes

0 to 2 Wake up game: hopscotch discs

- Scatter the discs about a stride apart through the grid.
- They travel across the grid by jumping from disc to disc, and they may not touch the grass.
- Two feet for the first minute, then one foot for the second. Silent, or he starts again.

2 to 10 Movement: landing on one foot

- Waves of six over the mini hurdle. Two feet to take off, one foot to land.
- Hold the one foot landing for two seconds before he moves. That hold is the whole exercise.
- Four waves on the left foot, four on the right. Most boys have a bad side.
- Any boy who cannot hold it goes back to two feet for the rest of the night.

10 to 17 Challenge game: longest silent jump

- Two feet to two feet, as far as he can, landing held still for three seconds.
- If he wobbles or you hear it, it does not count and he goes again.
- Eight goes each. They will learn to jump shorter and land better, which is exactly right.

Coach one thing: Hold the one foot landing for two seconds, or go back to two feet.

- The knee falling in on a one foot landing. This is the single biggest injury sign at this age.
- The pace goes up tonight. It never goes up on a Thursday.

Lashing rain. One foot landings on wet grass are not worth it. Stay on two feet all night.
