

The hardest night of the theme. Linear speed meets lateral agility: sprint in, shuffle the snake, and explode out.

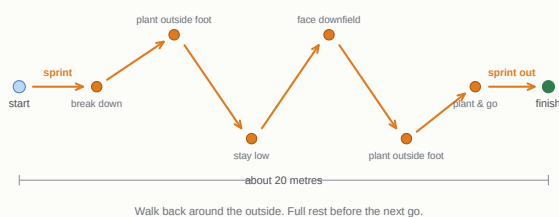

ON THE GROUND

- 16 cones: two 8-cone snake lanes, 20 metres long
- Hands free

1 minute setup. Set it up before the first group arrives and leave it for all three.

8-cone snake: sprint, shuffle, sprint

sprint to cone 2, stay low and shuffle the zigzag, plant and sprint out

8-cone snake: sprint to cone 2, stay low and shuffle the zigzag, plant and sprint out

1 to 6 Movement: sprint, shuffle, sprint

- Two 8-cone snake lanes side by side, 20 metres long. Teach the pattern at half pace first.
- Sprint 5 metres to cone 2, break down into a lateral shuffle through the zigzag, plant and sprint out past cone 8.
- 1. "Stay low in the tunnel. Do not let your chest or hips rise up when you hit the cones."
- 2. "Keep your chest facing forward down the pitch. Hips square, no crossing your feet."
- 3. "Hard push off the outside foot at each turn to redirect your body."
- Four or five waves, one boy in each lane at a time. Walk back along the outside. Full rest between goes.

6 to 11 Challenge game: snake races

- Pairs matched by speed, one boy at the start of each snake lane.
- "Go" on the whistle: sprint, shuffle, sprint flat out to the finish line.
- The winner is the first boy through cone 8 who stayed low through every turn without knocking a cone or crossing his feet.
- Switch lanes and pair up with someone new each time.
- Five or six races each. Full rest on the walk back before going again. Quality goes first when tired.

Coach one thing: Staying low in the shuffle and driving off the outside foot into the sprint.

- Boys who stand up tall or bounce upright in the shuffle. Keep them low in the tunnel.
- Feet crossing over during the shuffle. Keep the base wide and push off the outside leg.
- Slowing down before the final sprint instead of planting hard and driving forward.

Lashing rain. Widen the zigzag and ease the sharp cuts if the grass is greasy. Full speed needs firm footing.
