

Match in two days. Same running, faster, fewer goes, nothing new.

ON THE GROUND

- 12 cones, six lanes, 15 metres
- 25 discs beside the lanes
- A ball each, 5 bibs

Set it up before the first group arrives and leave it for all three.

Six lanes 15 metres long, a cone at each end, and a disc for every boy

0 to 2 Wake up game: stuck in the mud

- Five boys in bibs are the taggers, everyone else runs inside the grid.
- A tagged boy stands still in the big step, front knee bent, and holds it.
- Another boy frees him by tapping his shoulder. Change the taggers once. Two minutes.

2 to 8 Movement: running tall with a ball

- Four waves of six over 15 metres at match pace, ball in hand.
- One arm is carrying, so the other arm has to do the work properly. Say that once.
- No teaching and nobody stopped in the lane.

8 to 13 Body shape: the big step

- A disc each. Eight each leg, slowly, with the back knee going low.
- Then hold the bottom of one for five seconds on each leg.
- Walk down the line and look straight at the front knee of every boy.

13 to 17 Finish: two free sprints

- Two waves at whatever pace they like over the full fifteen metres.
- Then walk them in and ask two boys to name the shape.
- Hand them on. Match on Saturday.

Coach one thing: Nothing. Watch the arms of the boys who were bad on Tuesday.

- The carrying arm pulling the body across itself. It is common and it is fixable later.

Lashing rain. No change.
