

Two large circles, at least 10 metres across, with plenty of room between them. Sprint chasing around the outside: first on foot, then soloing on the hurl.

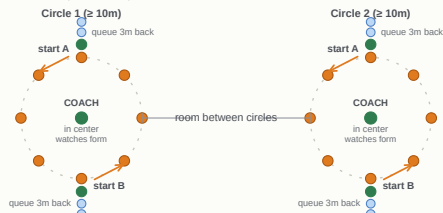

ON THE GROUND

- 16 cones: two large circles (at least 10m diameter) with opposite start cones
- A hurl each and sliotars

1 minute setup. Set it up before the first group arrives and leave it for all three.

Two large chase circles: opposite starts, 2 laps anti-clockwise

at least 10m diameter · half squad each · queue 3m back · coach in center

Both boys sprint anti-clockwise. Coach in center watches form and ensures boys stay outside cones.

Two large chase circles: opposite starts, 2 laps anti-clockwise, queue 3m back, coach in center

1 to 6 Movement: two-circle running chase

- Two large circles at least 10 metres in diameter, with ample space between them. Half the group at each circle.
- For each circle, break the boys into two groups placed behind opposite cones.
- Waiting boys line up at least 3 metres back from the circle to not impede the runners.
- Coaches stand in the center of the circle to watch form and ensure the boys keep outside the cones.
- On the whistle, the front boy at each cone runs anti-clockwise trying to catch the boy from the other side.
- They complete two laps of the circle, returning to their original cone or stopping wherever one boy catches the other.
- Then the next two boys step forward and repeat the drill. Each boy runs once.
- Focus on sprinting form: keep the head up as much as possible and lift the knees for speed.

6 to 11 Challenge game: solo chase and circle races

- Repeat of the first drill, but this time soloing a sliotar on the hurl while trying to catch the other boy.
- Same setup: two laps anti-clockwise, lines kept 3 metres back, coach in the center.
- Maintain form under pressure: head up to navigate the curve and lifting knees high for speed.
- If there is time for a third exercise, run a race between the two groups in each circle:
- Coach throws a sliotar on the ground in front of the starting boys to pick up and go.
- On completing their laps back to the starting point, each boy throws the sliotar on the ground in front of the next boy in line.
- First group to get all boys through their laps wins.

Coach one thing: Keeping the head up as much as possible and lifting knees for speed.

- Head down watching the ground or sliotar. Keep the chin up and lift knees high.
- Boys crowding the circle. Keep all queues strictly 3 metres back.
- Cutting inside the cones. Runners must stay on the outside perimeter for the full two laps.

Lashing rain. Keep circles wide and take care on greasy grass. Ease into the turns if slippery.
